This message is being sent globally to people who know me and know the amount of work I have done throughout my life to promote a better life from everyone. I would ask you to listen to the audio which accompanies this message. I need help to structure the organisation I want to set up, which is a global university dedicated to producing knowledge for the benefit of everyone. Although the name is in Irish, it is a multilingual, multitopical academy of knowledge. There are immense opportunities here, and I ask for your support. Also accompanying this message is a zip file, Projects Seminars Research Development, which contains more detailed information, I ask you to push it through your own networks. I can only do so much on my own, and at present I really must get back to editing my poetry.

If you have occasion to interact with the Department of Education in Ireland, please use the reference numbers 1304647SR, or 1304647BC.
